Alushade™ Patio System Features

- Australia's only 100% patented and engineer-certified aluminium patio/carport and deck framing system.
- The system allows for structures to be built in marine and other harsh environments.
- All existing roofing products can be used, including single-skin roofing, insulated panel roofing, polycarbonate products and the Alushade Louvre Roof System.
- Unique internal beam profiling provides the longest spanning beams in the patio/carport/deck market.
- Engineer-certified Internal bracketry and connectors provide superior structural capacity and unparalleled aesthetics.
- Specially designed stainless steel 'connector bolts' are used to attach all bracketry and connectors.
- To avoid galvanic reaction with the aluminium components, nylon sleeves are included with the connector bolts.
- Patented Duroball™ mounting system.
- Motor combines strength with smooth, quiet operation.
- Optional LED strip lighting for night time lifestyle and stunning effect.
- No-leak weather-tight seal withstands Australia's toughest conditions.
- Remote control operation including rain sensor functionality.
- Choice of louvre blade profiles.
- Suitable for both domestic and commercial applications.

Warranty

Industry leading warranties are available on both structural and product component. Please contact us for further information.

Patented Duroball™ Technology

The Duroball™ louvre-mounting solution is a unique, patented, and award-winning innovation.

At its simplest, it can be described as a ball-and-socket style of junction with integrated angular adjustment for louvre-blade positioning.

The Duroball™ solution is housed in a sleek aluminium channel which hides the screws and bolts.

The Duroball™ solution also isolates all metal componentry from direct contact with each other. This eliminates the squeaking and rattling often associated with opening roofs. Potential bi-metal corrosion is also vastly improved with our metal component separation, especially in highly corrosive environments.

Louvre Blade Options

The Singlefin™ louvre offer a sleek and contemporary underside profile to compliment any residential or commercial application.

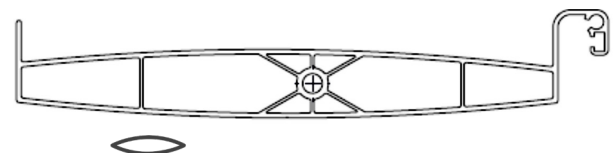

SingleFin™
LOUVRE BLADE

Spanning capabilities can be offered up to 4.2 metres.

The Dualskin™ louvre is sleek and beautiful shape is the result of subtly curved surfaces on the top and bottom. It is an ideal choice for designers and those who appreciate stunning aesthetics.

The Dualskin™ louvre also has exceptional strength with spanning capabilities of up to 4.5 metres.
