

Fixed Louvres

Solar Control Solution

Fixed Louvre Solar Control System

Alspec's full range of louvre blades from 50mm up to 300mm have been expertly engineered and designed with great aesthetics in mind.

This range of blades, some including their own bracketing systems, allow design and installation flexibility, while minimising heat and glare assisting in thermal performance buildings. Whether you need plant room louvres, louvre doors or storm proof louvres with specific airflow requirements, Alspec have released their extensive range fixed louvre options to cater for virtually any function necessary.

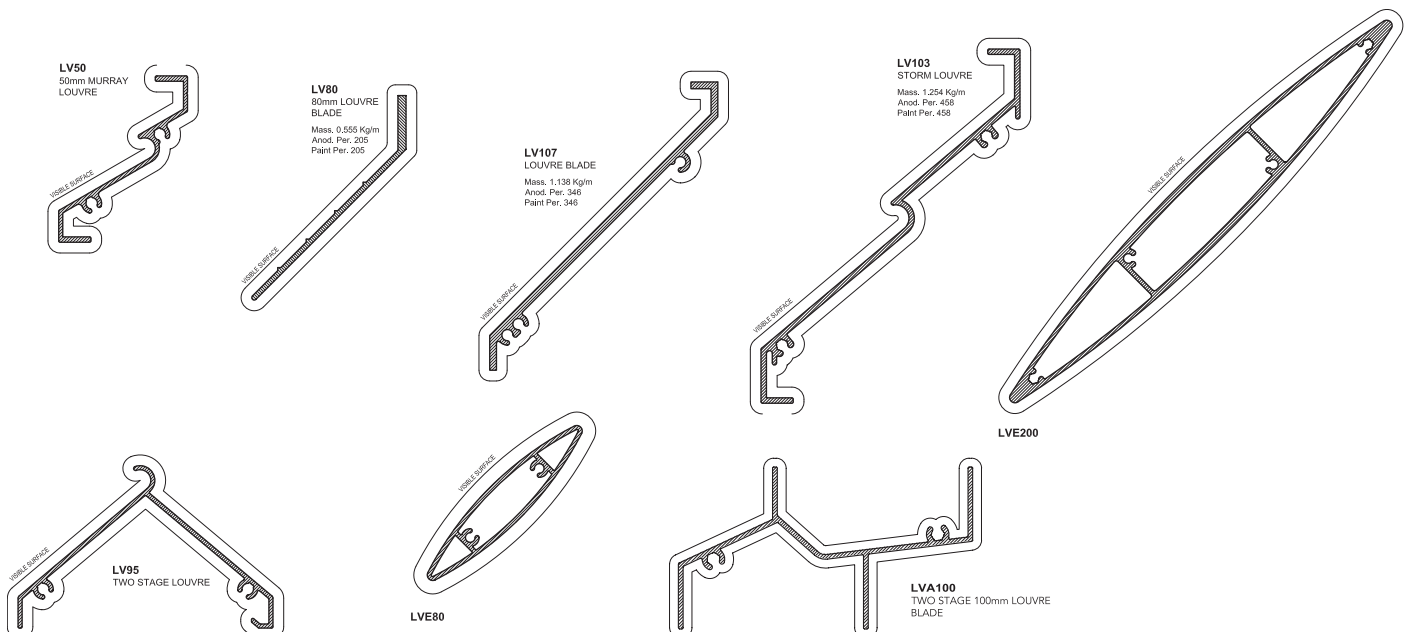

Key Features

- Multiple blade shapes and sizes
- Aesthetically pleasing without sacrificing performance
- Free Air-Flow calculations
- Design and installation flexibility
- Infinite range of Powdercoat and Anodised finishes available
- Performance data simulations to AS4740
- Louvres for hinged and sliding doors also available
