SECURITY OPTIONS FOR EVERY AUSTRALIAN

Alspec have been leaders in securing your home for over 45 years. With trusted brands, tested products and a national network of dealers, you can trust an Alspec Security Systems dealer to secure your home.

WHY CHOOSE AN ALSPEC SECURITY SOLUTION?

Alspec is an Australian-owned, forward-looking company, we work in-house to design, develop and test reliable aluminium systems.

Every Alspec Security Solution product is custom made to size. Our dealers will do a site check, measure and quote.

Alspec Security Solutions have been designed by Alspec's in-house R&D Team and manufactured in Australia by our Licensed Dealer Network.

Alspec Security Solutions is supported by a warranty from Alspec.

All Alspec Security Systems have undergone a comprehensive testing regime to ensure compliance with Australian Standard AS5039-2008.

Dynamic Impact Test

This test simulates an intrusion attempt, evaluating the screen's ability to withstand forceful entry.

Jemmy Test

This test simulates an intrusion attempt, where an intruder employs a lever to test the screen's resilience in preventing the opening of locking areas on the frame.

Knife Shear Test

This test assesses tensile strength by subjecting the mesh to multiple incisions with a knife.

OUR RANGE

All our products are manufactured and installed by our licensed dealers who have been trained by the Alspec Security Systems product team.

INVISI-GARD SECURITY SCREENS

Invisi-Gard is our premium security screen solution.

Invisi-Gard incorporates the Patented EGP Retention Method which locks the 316 Marine Grade Mesh into the heavy duty extruded aluminium perimeter framing.

At the heart of every Invisi-Gard security screen and security door is our high tensile 316 marine grade stainless steel mesh which sets the world standard in terms of its quality, precision and longevity. Invisi-Gard security doors and screens are without question the best investment for your family's safety.

ECO-GARD SECURITY SCREENS

Where affordability meets peace of mind.

Eco-Gard™ is a bespoke and affordable security screen solution.

The frame has been designed and tested to make it a more affordable option whilst not compromising performance, ensuring security is available to all Australians.

Optimised Security Mesh™

The mesh used is an exclusive stainless steel mesh to Alspec.

OUR RANGE

ALU-GARDEGE

ALUMINIUM SECURITY SCREENS

Alu-Gard Edge is the latest addition to the Alu-Gard range, the all-Aluminium security screening solution for Australian conditions. The difference is that a PVC pressure retention system that retains the Alu-Gard perforated aluminium sheet in an extruded aluminium frame. This makes it stronger than the Alu-Gard product.

ALU-GARD

ALUMINIUM SECURITY SCREENS

Strength, security and durability with excellent direct clarity of vision.

Alu-Gard utilises a strong 1.6mm perforated aluminium sheet or aluminium grille retained in and mechanically fixed to an extruded aluminium frame. Alu-Gard not only provides security, clarity of vision and strength, it is also corrosion resistant and looks great.

OUR RANGE

VISION-GARD

ALUMINIUM SECURITY SCREENS

Vision-Gard Screens utilise a strong (1.6mm thick) aluminium sheet that is perforated and powder coated. This mesh works by limiting the field of vision for people on the outside looking in. Vision-Gard works if there is correct lighting allowing a person on the inside to see outside and not be seen from the visitor's side.

The mesh has two options for retaining in the frame:

1. Retention with our bespoke Wedge PVC pressure retention system.
2. Retention using rivets into a frame with a covering strip to conceal the rivets. The resulting screen is strong, extremely resistant to corrosion and provides excellent clarity of vision from the inside looking out.

Fall Prevention

7 Year Standard Warranty

TESTED & CERTIFIED

ALU-GRILLE

7 MM DIAMOND GRILLE

Alu-Grille Security Screens are primarily designed for front door security. However, they are also suited to a wide range of residential applications including:

- Hinged doors
- Sliding doors
- Security window screens

Grille Options:

- A117 Small Diamond
- Standard 7mm Diamond
- A227 Decorative Diamond

Security doors made from quality Alu-Grille® can be fitted with the extra feature of a 3 Point Safety Lock. Three interlocking security hinges deter even the most persistent intruder.

Fall Prevention

7 Year Standard Warranty

TESTED & CERTIFIED

OUR RANGE

Independently tested to exceed the performance requirements for cyclone regions C and D, Invisi-Maxx screens have also demonstrated under NATA certified testing to withstand projectiles from debris travelling up to 44m/sec, offering a much higher level of protection than the Australian Standards that require 35.2 m/sec. For those seeking the maximum in security protection, the same qualities which make Invisi-Maxx cyclone compliant make it the ideal screening system to protect homes and business from unwanted intruders.

KidScreen is a unique patented cost effective barrier solution designed specifically for child protection of openable windows.

The KidScreen prevention screen has been successfully tested and meets the requirements outlined in the Australian Standards AS5203 - 2016 Protection of Openable Windows/ Fall Prevention, exceeding the minimum 250N force (25kg) required as outlined in the National Construction Code 2013 (D.2.24).

Use of a KidScreen prevention screen when secured correctly to the window means it can be left fully opened. This means no restricted opening is required.

CARE & MAINTENANCE

We recommend to clean your Alspec Security Screen System with 2-in-1 Cleaning & Protection Solution and a soft brush using warm water. Soak soft mitt and wring it before cleaning mesh thoroughly. Do not use strong detergents or abrasive cleaners as they may scratch or damage the surface finish.

The frequency of this maintenance is determined by the location of the product. Refer to the suggested maintenance table.

ENVIRONMENT	RECOMMENDED MAXIMUM MAINTENANCE INTERVAL
Mild	Six Months
Moderate	Three Months
Tropical/Severe	One Month
