

Classic Sliding & Stacking Door

Classic Sliding and Stacking Door

The Carinya Classic Sliding & Stacking Door is a product in the residential market having evolved out of a system designed for the high rise apartment market. This commercial background means that besides a modern designer look, the Carinya Classic Sliding & Stacking Door is packed with a multitude of performance features, many of which are simply not available in competing products.

The Carinya Classic Sliding & Stacking Door has been matched with commercially designed hardware to ensure style and durability.

Key Features

- A complete range of threshold and jamb in-fills as well as end caps to conceal all cavities. This not only provides a superior quality, commercial grade finish but also minimises places for insects, dirt and grit to gather.
- An internally concealed weather flap also reduces air and water infiltration and minimises insect intrusion through the drain holes.
- All Carinya sliding & stacking doors feature a choice of sill configurations catering for every weather performance requirement, including a wheelchair accessible sill.
- There is also a range of attractive interlock options to meet a wide variety of wind load requirements up to the most demanding cyclonic conditions.
